## Being Able to Speak to Spirit

*By Estelle Roberts 2015*

I have been thinking about the work which lays ahead of us and the fact that we allow the audience to talk to us. It is quite strange when I listened to a comment that was made, the fact that the people who we go to speak to find it alarming that they can actually speak to spirit. It is not something that I had ever contemplated in that form because obviously we have the capacity to converse on a one to one basis as we do on regular occasions and it is not something that I considered was anything other than the norm. But the proposed direction was put together by Maurice and the group that he works with. I was merely advised that this is what was going to occur and therefore I had to accept it and go along with it.

And that's why I didn't consider that it was anything other than the norm because it was given to me, as you would say, as a fait accompli and therefore I would accept it as being a normal occurrence. I have, since I listen to the comment, been around the various churches, because obviously that's where the big difference is going to occur, and I find out that the comment was 100% correct. They are a stuffy lot when they go and do their talks in the churches aren't they? That is when they're not giving the evidential messages, when the small amount of time which is devoted to teachings from the spiritual world, teachings from spirit as you so quaintly call it, they are very...I'm sorry I can't use any other words, but they are very stuffy.

Yes.

Well they are! The humanity is just not there. We know that to get the message through to people it is far easier to converse on a friendly basis than it is to converse, as you would in a pulpit, because what happens when you listen to the talks in the pulpit? You go to church and you listen to the sermon and you think "Oh that was very nice, very informative. I've done my bit now and therefore I can carry on living exactly the way I was before."
